

ARC COLLECTION COLOR CODES

Arc Collection offers homeowners three color options on tempered glass - red, black and white. The best way to color match these options to their design palette is to use the RAL codes* assigned to each color. RAL is a universal color coding system that helps normalize what red means to you and I. Below are the RAL color codes for the Arc Collection hoods:

	RAL 3000 - Horizon and Plane
	RAL 9011 - Horizon, Plane and Layers wall/island
	RAL 9010 - Horizon and Layers wall/island

	
Horizon Red (AHZ-M90ARX) Plane Red (APN-M90ARX)	
A good reference for RAL 3000 is the Bertazzoni range pictured here in an actual display setting.	

*RAL codes - when viewing RAL codes on your computer be aware that color will be interpreted differently by each computer. It's best to see actual color cards or the product if possible. To learn more about RAL please visit <http://www.ral-ggmbh.de>
